My phone is busy. I'm on the conference meeting with Liz Janes on WellSTAR and the UIC National Database. But, I've checked the well's location and it is inside the proposed AE area. The Application though is only for the Santa Margarita.

I'll call you Jerry, I am not seeing it on the map. I thought the spreadsheet shows the Etchegoin as part of the AE application.

This location of this well is included. The well is idle and hasn't been injecting since February 2010, at least to our knowledge. Also, the well injects into the Etchegoin, not S.M.

Jerry

One more thing Jerry, Alon has four wells. I don't see W1-1 on this map. API 029-64415

Jerry,

Thanks for checking on this so quickly. Much appreciated.

Good morning –

It is confirmed that the area where Alon and San Joaquin's wells are located are included in the Fruitvale AE application. Please refer to the attached map. Thanks.
